

Allianz Partners Responds to Cost Living Crisis with refreshed Overseas Visitor Health Cover for Australia's International Workers

BRISBANE, Australia, June 22, 2026 /PRNewswire/ -- Allianz Care, part of global leader in insurance and assistance services [Allianz Partners](#), has unveiled a [refreshed Overseas Visitor Health Cover \(OVHC\) portfolio with new product 'Everyday Care Workers'](#), designed to better cater to a range of budgets in Australia's international workforce. This product offers practical and accessible health coverage, including uncapped general practitioner (GP) visits and admitted hospital benefits, affordably priced from AUD 93 per month for Single policyholders.

The launch follows findings from Allianz Partners' [customer research](#), which identified a growing group of recent graduates and skilled workers seeking affordable GP access without the higher costs of specialist coverage. The [2025 State of Student Healthcare Report](#) identified 85% of respondents underestimated the cost of living. With rising living expenses and more than 59% of international students planning to stay in Australia after graduation, the Everyday Care Workers product responds directly to this shift by offering a streamlined, cost-effective health cover option.

"Allianz Care has a long history of supporting international communities in Australia," said Miranda Fennell, Executive Head of Health, Allianz Partners Australia. "These updates demonstrate our ongoing commitment to providing health insurance that's clear, flexible, and truly focused on care, whether supporting international students transitioning from their studies into the workforce or welcoming international workers and visitors to Australia."

This product launch forms part of a broader refresh of Allianz Care's OVHC range, featuring simplified product names and a redesigned online purchasing experience. The updates make it easier for international visitors and workers to compare plans, understand inclusions, and choose cover aligned with their visa, lifestyle, and budget.

Demand for such coverage continues to grow. In 2025 133,891 temporary graduate visas were issued, up over 7% from grants in 2024 (124,687). This sustained demand for skilled migration underscores the importance of affordable health insurance as international students transition into the Australian workforce.

International students and workers also make a notable contribution to Australia's economy. According to the [Australian Government Department of Education](#), international education was worth almost \$55.0 billion to the Australian economy in 2025. The [Business Council of Australia](#) estimates that for every 1,000 migrants, there is approximately AUD 124 million in economic value per year.

Through the new Everyday Care Workers product, and refreshed OVHC portfolio, *Allianz Care* continues to deliver on its ambitions to make health insurance accessible, practical, and supportive for migrants.
