

Living with COVID-19

Focus on the home

Since COVID-19 forced the world into lockdown, the role of our home has become more central to our lives than ever before. Allianz Partners has enhanced its home assistance offering to protect customers and offer peace of mind around the home.

We are supporting our customers through...

Digital home services including the Macarena Voicebot to manage home claims 24/7 and Visi'Home, a video-diagnostic service for appliance and repair troubleshooting.

Protection against digital risk including online banking and shopping protection, data loss protection, E-reputation protection, and legal support for cyber risk.

High-touch services for the elderly like teleassistance and daily life support services like domestic care or social and medical advice.
