

# Re-opening the World

## Life after COVID-19

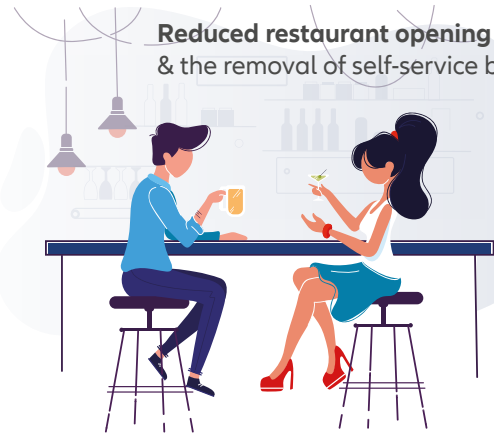

The post COVID **travel experience** will be likely to include:

**Less cabin bags** on planes and **reduced onboard food** to reduce contamination risks & speed-up boarding

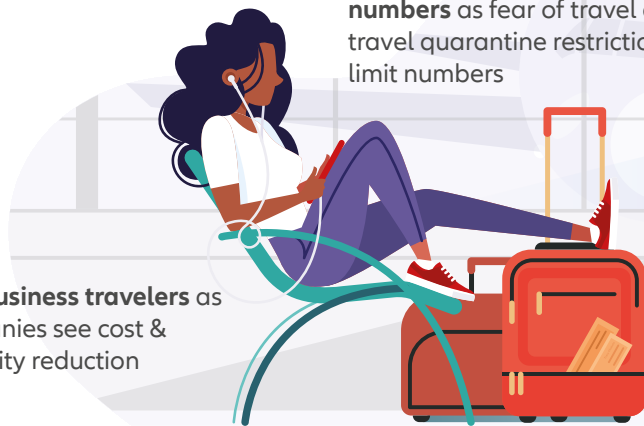

**Reduced restaurant opening hours** & the removal of self-service buffets

**Slow return of passenger numbers** as fear of travel and travel quarantine restrictions limit numbers

**Less business travelers** as companies see cost & necessity reduction

**A recovered market for international events** (sporting, exhibitions...)

These predictions come from Futurologist Ray Hammond, commissioned by Allianz Partners to look at how the world may be in 2021.
